KORBEL™
PLASTİK VE METAL PROFİL SİSTEMLERİ

Big King

KORBEL Plastik ve Metal Profil Sistemleri, kurucularının 25 seneye yakın yapı sektörü tecrübesi ve birikimlerini kurucusunun mühendislik zekasıyla birleştirerek, ürünlerini müşterilerine sunabilmek adına kendi üretimi olan metal profil sistemleri grubunda paslanmaz çelik bordürler, alüminyum ve çelik teknik profilleri, duş kanalları, yer süzgeçleri gibi ürün gruplarıyla üretim yaparken aynı zamanda plastik grubunda derz artıları, seviye tespit sistemleri ve yardımcı plastik ürünlerinde üretimini üstlenerek sektörde lider olma hedefleriyle faaliyetlerine devam etmektedir.

Temel ilkelerimiz “Kalite ve Profesyonellik”, sloganımız ise “Yenilikçi ve Pratik Çözümler” dir.

KORBEL kalite konusunda gücünü nitelikli ve kalifiye personel gücüyle beraber, uluslararası geçerli olan sertifikalı hammaddeler, CE, RoHS ve diğer kalite standartlarına uygun üretim esnekliği ile güvence altındadır. Bu kaliteyi sunarken farklı yüzey renklerinde, farklı model ve ölçülerdeki ürünlerimiz ile yurt içindeki müşterilerin tercih sebebi olurken yurtdışı müşterilerine de aynı şekilde hizmet etmektedir. Bütün ürünlerinin kalıp ve ambalaj tasarımlarını kendi ekibiyle tasarlayıp yapmaktadır. Ar-Ge çalışmaları ve sektördeki yeniliklerin takibi ile ürün gamını sürekli geliştirip, doğru stratejilerle kaliteli ve kullanışlı ürünleri müşterilerine sunmayı sürdürecektir.

Misyonumuz; müşterilerimizin istek ve beklentilerini tam olarak anlayıp, çevreci ve müşteri odaklı bir yaklaşımla ve ihtiyacı optimum düzeyde karşılayarak, ürünlerimizle müşteri memnuniyetini en üst düzeyde tutmak.

Vizyonumuz; kalite ve hizmet mükemmelliğinden ödün vermeden, esnek yapımız, yaratıcı çözümlerimiz, rekabetçi fiyatlarımız ile ürün tedarigi bakımından yurtiçi ve yurtdışı pazarda lider konuma ulaşmaktır.

About Us

KORBEL Plastic and Metal Profile Systems combines the 25-year-old construction sector experience and know-how of its founders with engineering intelligence, and produces its own metal profile systems group with product groups such as stainless steel borders, aluminum and steel technical profiles, shower channels, floor drains. At the same time, it continues its activities with the aim of being a leader in the sector by undertaking the production of tile spacers, tile leveling systems and auxiliary plastic products in the plastic group.

Our basic principles are “Quality and Professionalism” and our motto is “Innovative and Practical Solutions”.

KORBEL is assured of its about strength in quality, with its qualified personnel power, internationally certified raw materials, production flexibility in accordance with CE, RoHS and other quality standards. While offering this quality, our products in different surface colors, different models and sizes are preferred by our domestic customers, while serving also foreign customers in the same way. It designs the mold and packaging of all its products with its own team and it will continue to continuously improve its product range with R&D studies and follow up innovations in the sector, and offer quality and useful products to its customers with the right strategies.

Our Mission; to keep customer satisfaction at the highest level with our products by fully understanding the demands and expectations of our customers, with an environmentally friendly and customer-oriented approach and meeting the needs at the optimum level.

Our Vision; to reach a leading position in the domestic and international markets in terms of product supply with our flexible structure, creative solutions, competitive prices, without compromising quality and service excellence.

Korbel Kalitesi ve Profesyonelliği ile ...

Quality and Professionalism

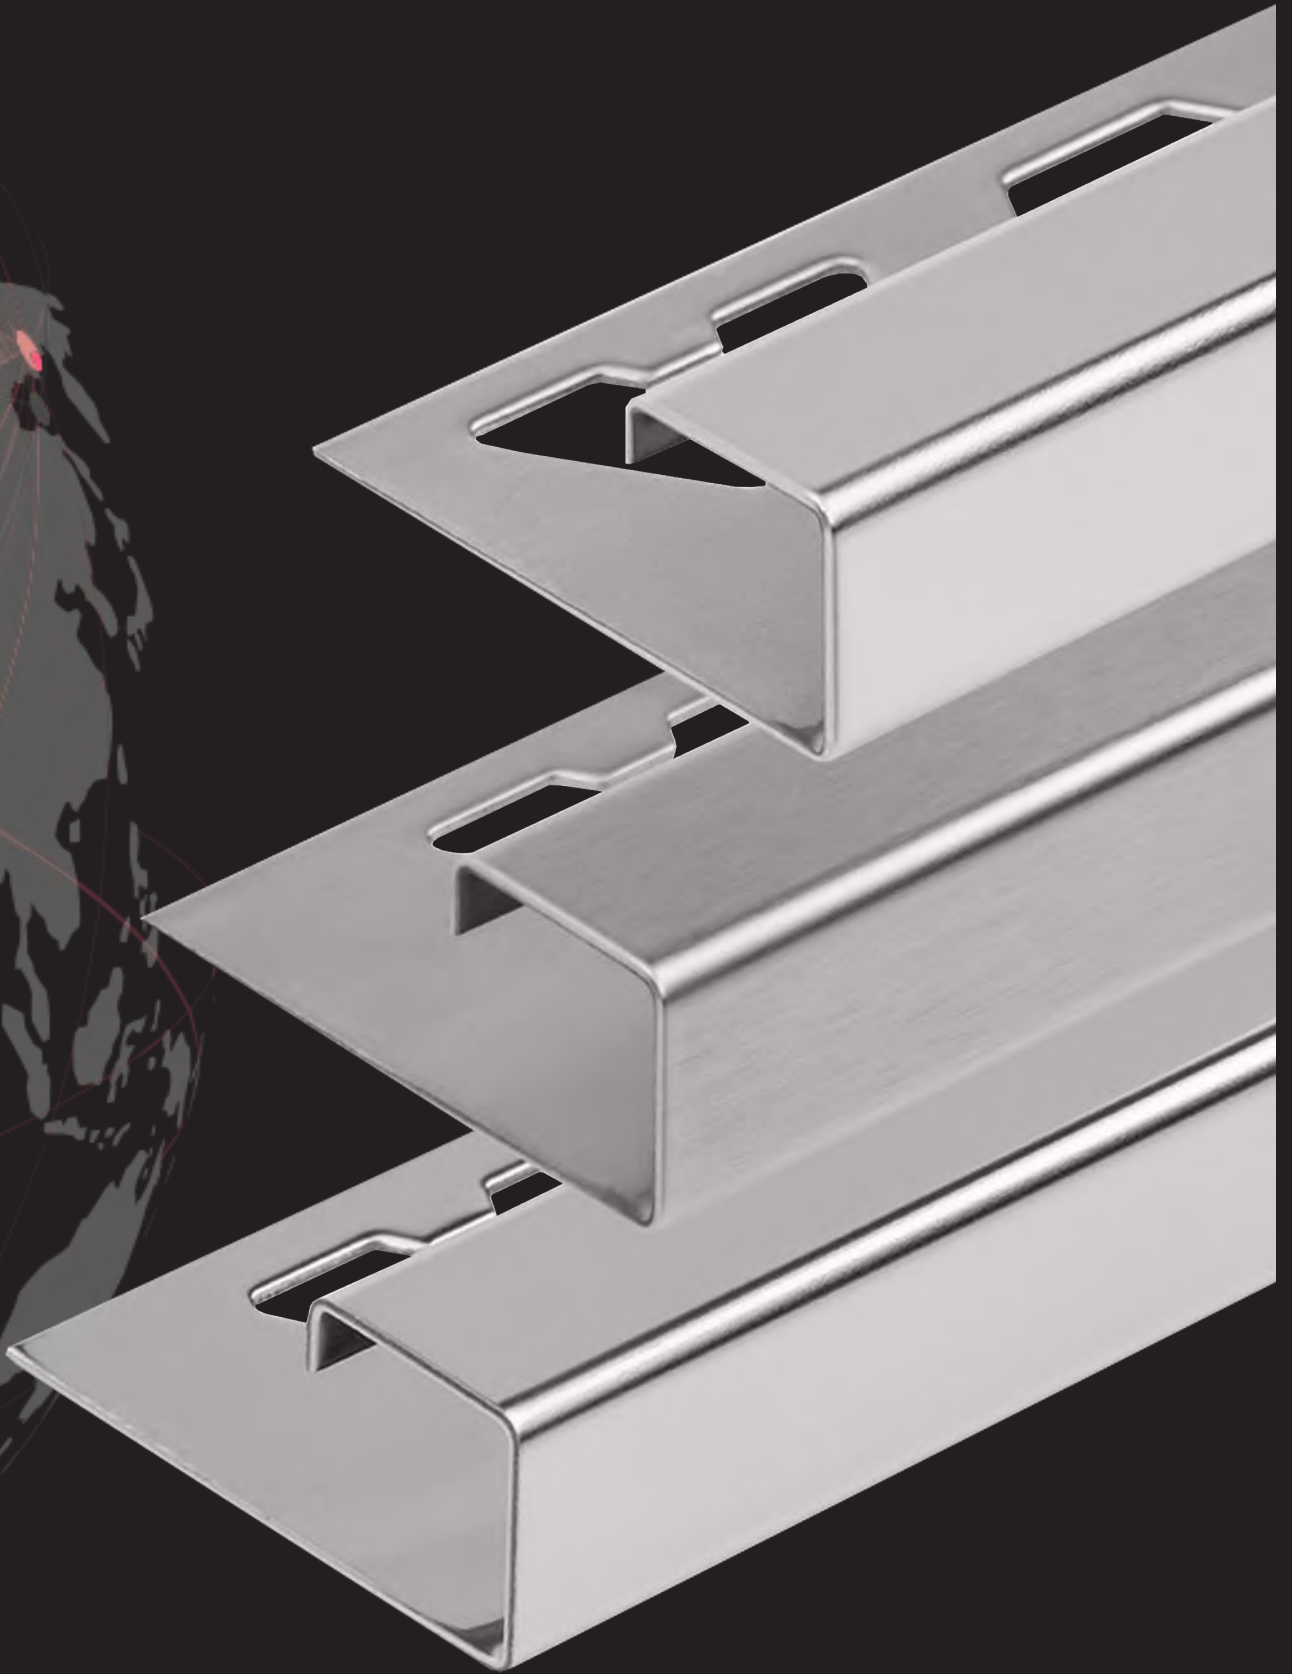

Export Process

- The features and dimensions of the product subject to the order are determined and delivered to us.
- The suitability of the product is tested by the production unit, the sample is made. If approved, information about pricing and delivery time is given.
- Order confirmation is provided by e-mail with a proforma invoice. The first payment is received for the start of production and the production of the product is started.
- During the production process, the products are checked and visual information is given to the customer. After the production of the products is completed, the products are packaged and made ready.
- After the necessary paperwork is completed, the products are received from the factory. The customer is visually informed and the remaining payment is received. The customs process begins.
- The products are tracked until they leave the Turkish customs. The process is completed by providing the necessary information.

304 kalite paslanmaz çelikten üretilmiştir. Kare dış köşe bitim profili seramik kaplama bitişlerinde keskin yüzeyleri kapatır ve farklı malzeme geçişleri için sınır oluşturur. Seramik bitişinde oluşan keskin yüzeyleri kapatarak hem güvenilir hem de görsel bir işlev kazandırır. Kare dış köşe profili ile seramik kesim hatalarını kapatarak temiz bir uygulama elde edebilirsiniz.

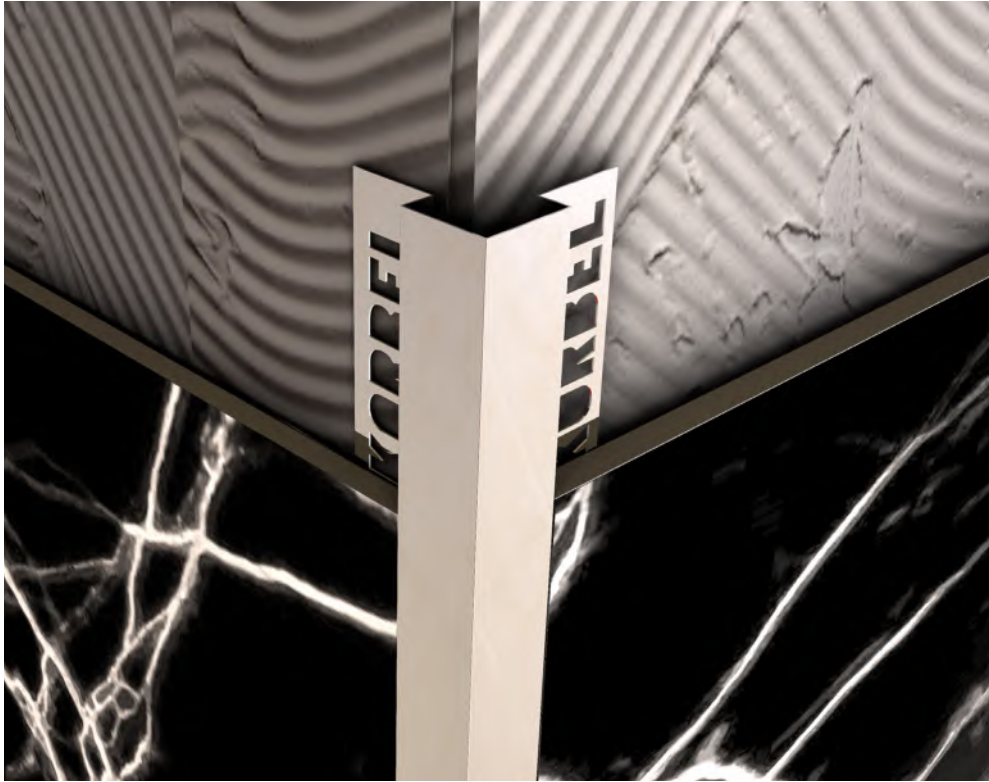

It is made of 304 quality stainless steel. The square outer corner finishing profile covers sharp surfaces in ceramic coating finishes and creates a border for different material transitions. It provides both a reliable and visual function by covering the sharp surfaces formed on the ceramic finish. With the square outer corner profile, you can get a clean application by closing the ceramic cutting errors.

304 kalite paslanmaz çelikten üretilmiştir. Fayans, sıva veya duvar kağıdı bulunan yüzeylerde köşeleri korumak için kullanılır. Ağırlık olarak sanayi sektöründe, alışveriş merkezlerinde, otellerde ve insan sirkülasyonun yoğun olduğu yerlerde kullanılır. Farklı renk çeşitleri, parlak ve satin seçenekleri ile iç mekan tasarımınıza en uygun seçeneği bulabilirsiniz.

It is made of 304 quality stainless steel. It is used to protect corners on surfaces with tiles, plaster or wallpaper. It is mainly used in the industrial sector, shopping malls, hotels and places where human circulation is intense. With different color variants, glossy and satin options, you can find the most suitable option for your interior design.

304 kalite paslanmaz çelikten üretilmiştir. Seramik kaplı duvar-duvar, zemin-duvar birleşimlerini kapatarak temiz ve estetik bir geçiş sağlamak için kullanılmaktadır. Banyo ve mutfak gibi ıslak hacim mekanlarında suya maruz kalan üzeyleerde su geçişini önleyici işlev görerek hem fonksiyonel hem estetik bir duruş sağlar.

It is made of 304 quality stainless steel. It is used to provide a clean and aesthetic transition by closing the ceramic-coated wall-wall, floor-wall joints. It provides both a functional and aesthetic stance by preventing water penetration on surfaces exposed to water in wet spaces such as bathrooms and kitchens.

Korbel dilatasyon profili, farklı renk ve yüzey seçenekleri ile 304 kalite paslanmaz çelikten üretilmiştir. Yüksek yapılarda bırakılan derz boşlukları için doldurma işlemi yapar. Böylece yapılarda bulunan bu boşluklar dilatasyon profilleri ile yapı iç mekan tasarımına fonksiyonel, şık ve dekoratif bir kullanım sağlamış olur. Tasarım ve mühendisliği birleştirdiğiniz noktada "Korbel" bulunur.

Korbel dilatation profile is produced from 304 quality stainless steel with different color and surface options. It fills the joint gaps left in high-rise buildings. Thus, these gaps in the buildings, with their dilatation profiles, provide a functional, stylish and decorative use to the interior design of the building. "Korbel" is located at the point you combine design and engineering.

T basamak profili genel olarak seramik ve granit kullanılarak oluşturulan merdiven basamaklarında, seramik yüzeylerin hatalarını kapatarak çirkin görüntünün önüne geçmek ve darbe emici özelliği sayesinde oluşabilecek hasarları önlemek için kullanılır.

T basamak profili uygulama esnasında ustanıza kolaylık sağlarken aynı zamanda zengin renk alternatifleri ile de kullandığınız malzemeye birebir uyum sağlamaktadır.

The T-step profile is generally used in stair steps made of ceramic and granite, to prevent the ugly appearance by covering the faults of the ceramic surfaces and to prevent the impact. It is used to prevent damages that may occur due to its absorbent feature. While the T step profile provides convenience to your master during application, it also adapts to the material you use with its rich color alternatives.

304 kalite paslanmaz çelik, temel paslanmaz çelik kalitelerinden biri olup, en yaygın kullanılanıdır. Bu kalite EN normuna göre 1.4301 ya da X5CrNi18-10, UNS normuna göre S30400, Amerikan Standartlarına göre AISI-304 olarak adlandırılmaktadır. Bu paslanmaz çelik kalitesi; kimyasal bileşiminin, mekanik özelliğinin, kaynak yapılabirliğinin ve korozyon-oksidasyon direncinin fiyatına oranla çok iyi olması sebebiyle tercih edilir. Banyolarda, merdiven basamaklarında, kot farklarında ve dış cephelerde hem dekoratif hem de teknik profil olarak kullanılmaktadır.

Kullandığımız hammaddeler uluslararası standartlara uygun ve sertifikalı ürünlerdir.

304 grade stainless steel is one of the basic stainless steel grades and is the most widely used. This quality is named as 1.4301 or X5CrNi18-10 according to EN norm, S30400 according to UNS norm, AISI-304 according to Americana Standards. This stainless steel grade; It is preferred because its chemical composition, mechanical properties, weldability and corrosion-oxidation resistance are very good compared to its price. It is used both as a decorative and technical profile in bathrooms, stair steps, elevation differences and exteriors.

The raw materials we use are certified products that comply with international standards.

Duvar dış köşeleri için bitiş profilidir. Seramik kaplamaların köşe kırıklarını, derz kayması ve görüntü kirliliğini kapatır. Duvarda halı, doğal taş veya epoksi kaplamaların temiz bitişlerini sağlamak için de kullanabiliriz.

It is the end profile for the outer corners of the wall. It covers corner cracks, joint slippage and visual pollution of ceramic coatings. We can also use it to provide clean finishes of carpet, natural stone or epoxy coatings on the wall.

Kaydırmaz basamak burun profili merdiven burunlarında bulunan pvc bant sayesinde kayganlığın önlemesi için kullanılmaktadır. Genellikle kullanım ve sirkülasyonun fazla olduğu yerlerde kullanılmaktadır. Alışveriş merkezleri, hastaneler, kamu binaları gibi yerlerde farklı renk seçenekleri ve boyutlar ile yapılarınızda fonksiyonel ve profesyonel bir uygulama elde edebilirsiniz.

Zemin kaplama uygulamalarında pratik bir terazileme uygulaması, derz aralıklarının eşit olmasını, düzgün bir işçilik ve bitim sağlamaya yardımcı olan geleneksel yardımcı seramik aksesuarlardır. Uygulama bitiminde hızlı ve basit bir şekilde sökülebilmektedir. Uygulamadan sonra sökülen takozları daha sonraki uygulamalarda kullanmanız mümkündür.

A practical leveling application in floor covering applications are traditional auxiliary ceramic accessories that help to ensure equal joint spacing and a smooth workmanship and finish. It can be dismantled quickly and simply at the end of the application. It is possible to use the wedges removed after the application in later applications.

**Oluklu Derz Artısı / Tile Spacer With Slotted****P 17-18 Serisi / Series - P17/18**

P-17	Beyaz/White	2 MM	500
P-18	Beyaz/White	3 MM	500

Fileli köşe profili uygulama kolaylığı ve düzgün köşe bitimleri elde edilmesini sağlayan kenardan fileli pvc esaslı profillerdir. Birleşme detaylarında düzgün bitişler sağlamak ve çatlak oluşumunu önlemek için kullanılır. Bina köşe birleşimleri, pencere, kapı ve tüm köşeleri dış etkilere ve darbelere karşı mekanik olarak korur. Fileli olduğu için sistemle bütünleşir.

Meshed corner profiles are self-meshed PVC-based profiles that provide ease of application and smooth corner ends. It is used to provide smooth finishes on the joint details and to prevent crack formation. It mechanically protects building corner joints, windows, doors and all corners against external effects and impacts. It integrates with the system because it has a mesh.

Tezgah süpürgeliği tezgah ve duvar ile arada bulunan boşluğu kapatmada kullanılır. Profilin köşelerinde bulunan silikon kenarlar sayesinde tezgahın su akışını engeller ayrıca tezgah ile duvar arasında şık bir geçiş sağlanmasına yardımcı olur. Farklı renk seçenekleri hem tezgah üstü duvar hem de mutfak dolaplarınıza uygun pvc profili tercih imkanı sunmaktadır.

Kitchen countertop skirting board is used to close the gap between the bench and the wall. Thanks to the silicone edges on the corners of the profile, it prevents the flow of water from the counter and also helps to provide a stylish transition between the counter and the wall. Different color options offer the opportunity to choose the pvc profile suitable for both your countertop wall and kitchen cabinets.

Küvet kenar profilleri küvet ve duşakabin montajında duvar ile arada bulunan boşluğu kapatmada kullanılır. Profilin köşelerinde bulunan silikon kenarlar sayesinde kabin kenarlarında su sızmasını önler ve oluşan boşluğun yerini şık görünüm kazandırır.

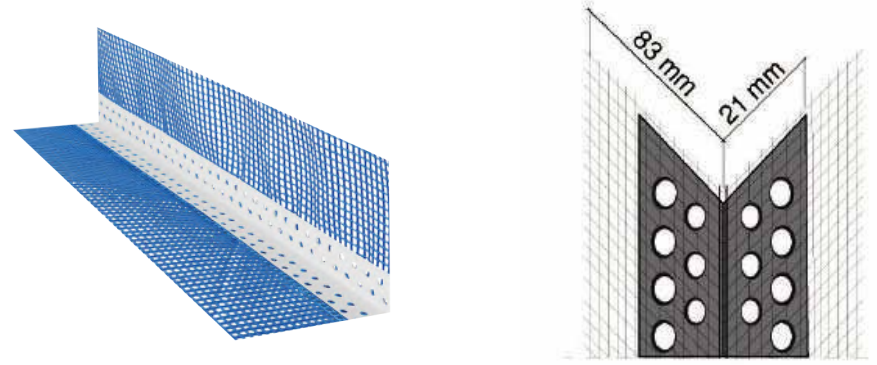

Bathtub edge profiles are used to close the gap between the wall and the wall in the assembly of bathtub and shower cabin. Thanks to the silicone edges on the corners of the profile, it prevents water infiltration on the cabinet edges and gives a stylish appearance to the space formed.

"INNOVATIVE AND PRACTICAL SOLUTIONS"

D48 Kanalları Serisi Shower Drain Series

Islak hacimlerde su tahliyesi sebebi ile kullanılır. Süzgecin kapak kısmı paslanmaz çelikten üretilmiştir. Paslanmaz çelik ve plastik kasa olarak üretim yapılmaktadır. Farklı renk seçenekleri ve farklı kapak modelleri ile seramik/vitrifiye ile uyumlu, şık ve modern bir görüntü sağlar. Koku önleyici klapesi sayesinde haşerelere karşı güvenli ve korumalıdır. Yatay ve düşey çıkışlı olarak üretilir.

It is used in wet areas due to water discharge. The lid part of the strainer is made of stainless steel. It is produced as stainless steel and plastic casing. With different color options and different cover models, it provides a stylish and modern look that is compatible with ceramic / sanitary ware. Thanks to the anti-odor flap, it is safe and protected against insects. It is produced with horizontal and vertical output.

Süzgeç Ana Gövde

Drainer Main Body

Islak hacimlerde su tahliyesi sebebi ile kullanılır. Süzgecin kapak kısmı paslanmaz çelikten üretilmiştir. Farklı renk seçenekleri ile seramik/vitrifiye ile uyumlu, şık ve modern bir görüntü sağlar.Koku önleyici klapе sayesinde haşereler karşı güvenli ve korumalıdır. Yatay ve düşey çıkışlı olarak üretilir.

It is used in wet areas due to water discharge. The cover of the strainer is made of stainless steel. With its different color options, it provides a stylish and modern look that is compatible with ceramic / sanitary ware. Thanks to the anti-odor flap, it is safe and protected against insects. It is produced with horizontal and vertical output.
